Last Date for Registration 24th September 2020

An E-Certificate will be given to all the active participants on their registered Email only after successful submission of feedback form

ABOUT THE WEBINAR

Jaintia Eastern College, Khliehriat was established in 1992 with the objective to provide quality higher education to the students who are the siblings of the poor and backward parents of the erstwhile Khliehriat Civil Sub-Division (now East Jaintia Hills District). In the best of its capacities, the college not only involved the students in class room teaching but also engaged them in different extra-curricular activities through National Service Scheme (NSS), Red Ribbon Club (RRC), etc. as it is done in every higher educational institutions in the country.

Again, interdisciplinary is an approach to curriculum integration and design which is highly useful as it makes the learner to understand the different themes and ideas that cut across disciplines. Interdisciplinary teachings also increases learners learning capacities by engaging them and help them to develop knowledge, insights, problem solving skills, self-confidence and develop in them a passion for learning.

The importance of interdisciplinary activities can also be understood from the fact that if learning is confined to a single disciplinary perspective, ambiguity often came into the scene which is either considered as a shortcoming of the analytical framework or evidence need to be adopted to provide clear prediction. It is on account of this that the NEP 2020 also laid emphasis on the significance of interdisciplinary research activities and to look into the connections we could possibly develop between different disciplines and the real world around us.

Knowing that it had been the long practice of our higher educational institutions to include extra-curricular activities in the teaching learning process and that students had been dedicated a good amount of time and efforts in those different activities without having counted as valuable record of their good performance during his or her period of studies, we feel that it is high time for us and the country as a whole to ponder upon and look into the possibilities of inclusion the extra-curricular activities as one discipline in higher education with the same motive to inculcate the spirit of social service in the youths of our country.

Hence, the purpose of this national webinar on the "Importance of Interdisciplinary activities in Higher Education" is not only to talk of the need and importance of interdisciplinary activities but also to throw light for inclusion of the extra-curricular activities as one discipline or subject of studies. In this manner, it will not only benefit the community at large but also the students who perform those activities, as they will be graded as per their performance.

Hence, to fulfill this objective it requires the intensive efforts and participation of academicians and the stake-holders.
